BODGER SEEDS, LTD.

Wholesale Growers

EL MONTE

LOS ANGELES COUNTY, CALIFORNIA, U. S. A.

[CABLE ADDRESS: "Bodger El Monte"]
REGISTERED • ALL CODES

TERMS AND GENERAL CONDITIONS OF DELIVERY

All seeds are quoted F.O.B. El Monte, California, for delivery after harvest crop 1933, 60 days net, less 2% cash 30 days. All invoices payable in U. S. dollars in or by New York or Los Angeles Exchange. All overdue accounts subject to sight draft without further notice.

Bags and containers will be charged at cost and are not returnable.

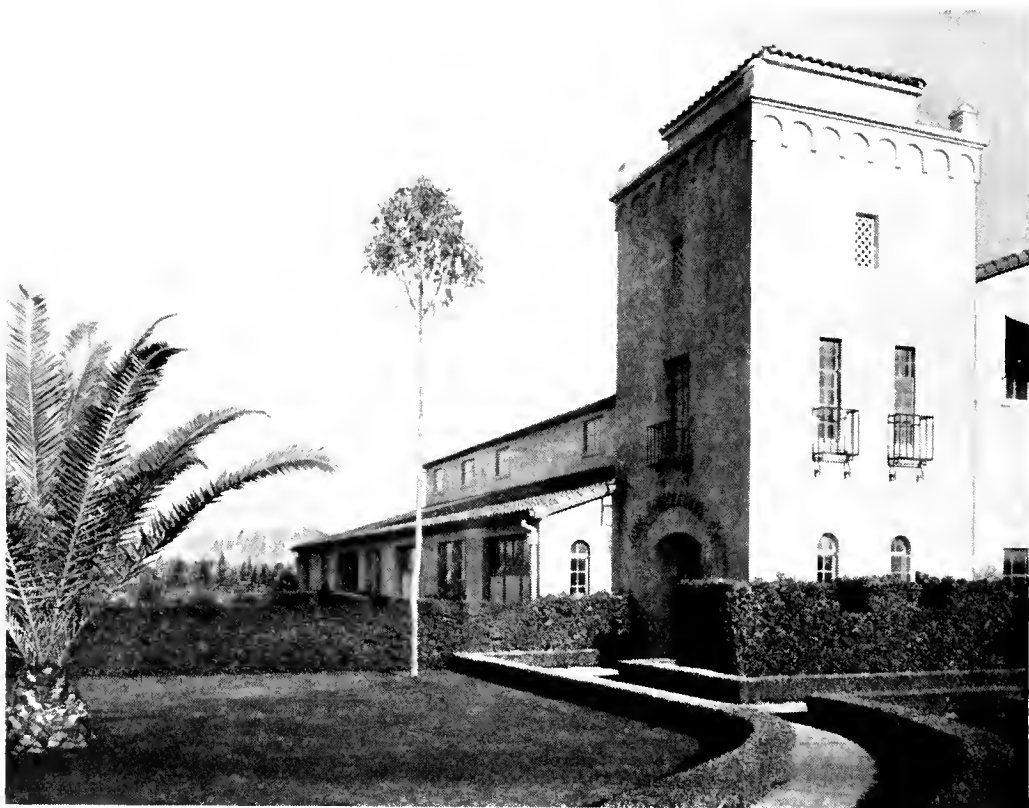

We reserve the right to advance any or all prices in this list on orders received after May 1st, 1933.

For every order, we agree to plant sufficient land to produce the desired quantity of seed under normal conditions.

In case of crop shortages, orders will be filled pro rata only.

Crop failure or any cause beyond our control releases us entirely from delivery.

We give no warranty, express or implied, as to description, quality, purity, productiveness, or any other matter of any seeds we sell, and we will not be in any way responsible for them. If seeds are not accepted on these terms, they are to be held subject to our order.

Our modern warehouse and shipping department, situated in the fertile El Monte Valley in the shadow of the snow-capped Sierras.

TO THE TRADE:

As we embark upon this, our 43rd year of producing quality flower seeds for our discriminating trade, it is with a feeling of pleasure and pardonable pride that we submit our 1933 contract and general trade list.

All our seeds are grown under the personal supervision of our staff of trained horticulturists, combining the latest in scientific methods with the vast fund of practical knowledge which has developed during the course of our three generations of flower seed growing.

We value the Medals and Awards of Merit won by our Flowers at horticultural exhibits, but place a higher value on the universal preference being manifested throughout the world by seedsmen who know and appreciate superior types and strains. Our method of selecting and hand-picking enables us to maintain our reputation as Growers of the BEST. In our forty-two years of Flower Seed Growing we have made an intensive study, not only of types and colors, but also of the climatic and soil conditions in which each class of Flower Seed may be produced to the best advantage.

A well balanced mixture cannot be grown as such in the field, since certain colors mature earlier than others. We, therefore, produce all of the important mixtures, such as Asters, Zinnias, Larkspurs, Sweet Peas, Verbenas and Cosmos, in separate colors, and make up the mixtures, using the correct proportions of each color to make a well blended, brilliant mixture when reproduced the first season from seed. These mixtures we generally offer as Finest Mixed, while our Good Mixed is grown in the field as mixed. For this reason we list in some instances both Finest and Good Mixed.

Our trial grounds, plant workshops and growing grounds are at all times open to the critical inspection of our trade, and we are always glad to escort our visitors through the up-to-date cleaning mills, warehouse and office maintained at our El Monte headquarters.

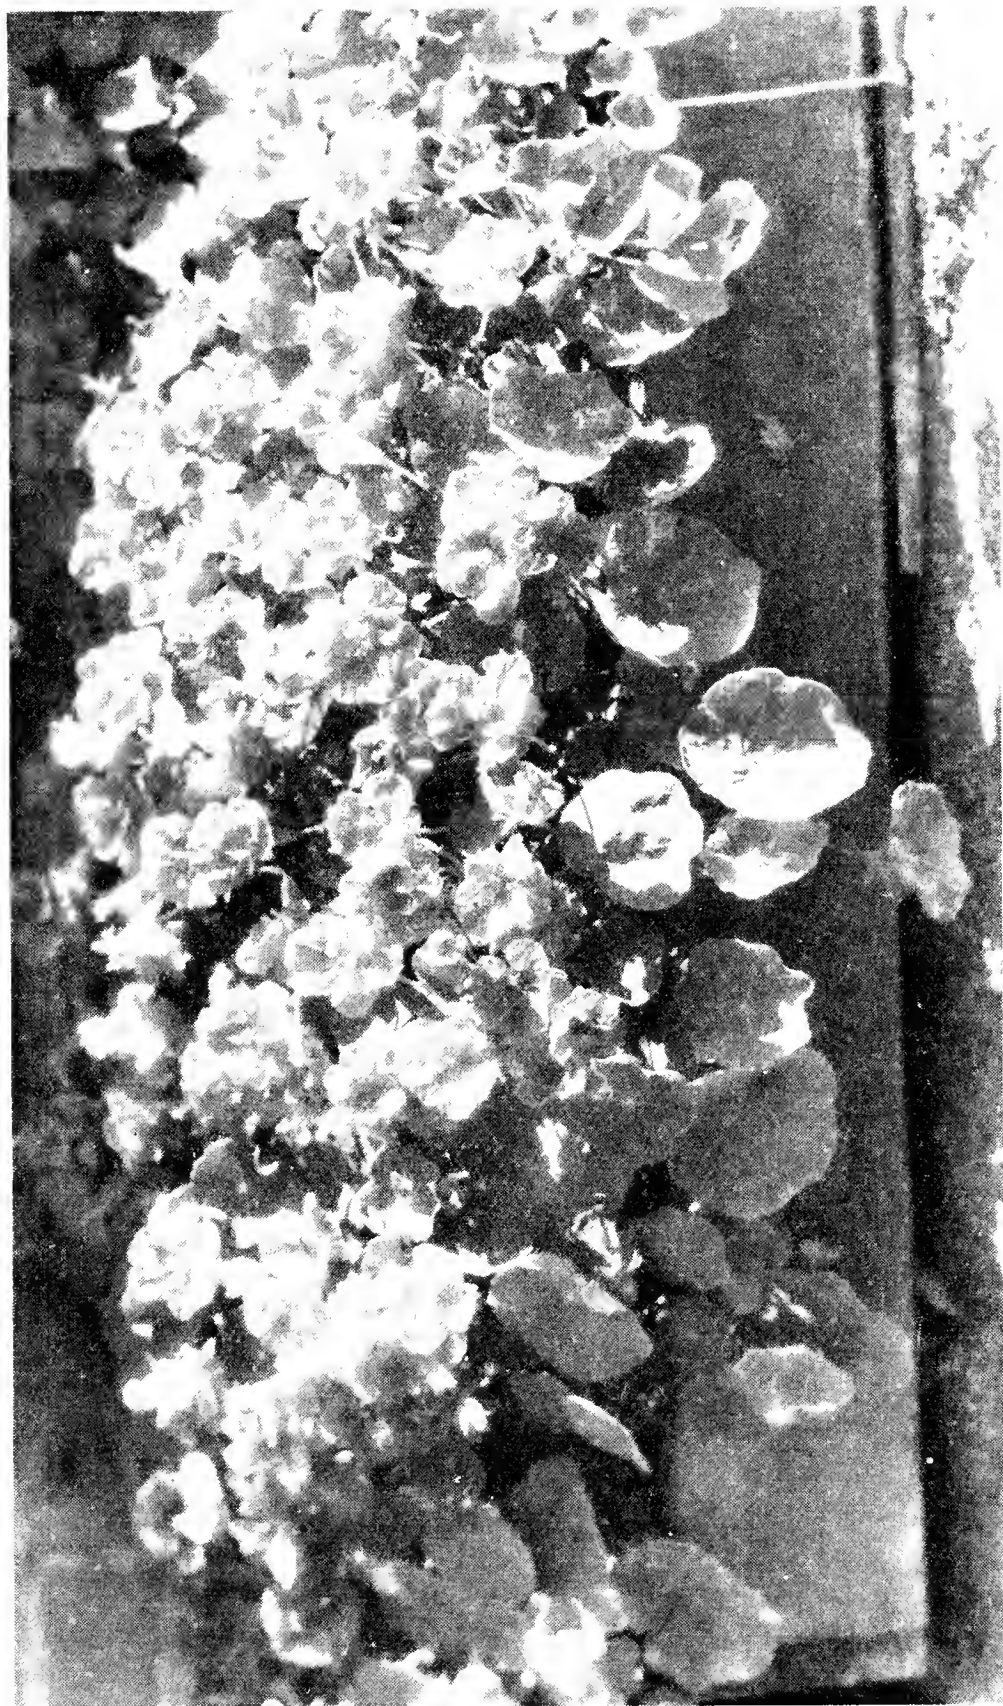

The introduction of our many novelties during the past years attests to the high standard of our stocks.

We are now in a position to furnish electrotypes of all the illustrations shown in this list and the prices of same are printed under each engraving. Electrotypes will be found satisfactory for one hundred thousand impressions, above that quantity we would advise the use of nickeltypes, and we can furnish them if so advised.

If interested in Photographs write us for particulars.

We wish to thank our friends for their past business, and trust we may continue to serve them.

NOVELTIES FOR 1933

It is very gratifying to observe the interest taken in novelties by the seed trade in general everywhere. This is evidenced by the incoming orders, especially for those varieties selected as All American Selections of Flower Varieties for 1932-33. We consider the activities of this committee a decided step forward in placing the better flowers before the public. It is our opinion that if this procedure is carried out from year to year, the outstanding novelties will be disseminated promptly throughout the trade, giving the grower much needed help and encouragement in the distribution of his product, and reimbursing him in part at least for the expenditure of time and money in the production of these novelties. This will encourage further work of this type among the seed producing centers. The wide publicity and distribution of Nasturtium Golden Gleam is an outstanding example of this idea.

BODGER'S NEW DOUBLE SWEET SCENTED NASTURTium GOLDEN GLEAM

Introduced to the trade last season as a novelty of exceptional merit, Nasturtium Golden Gleam continues to hold its place as the most outstanding introduction of recent years. Receiving medals and awards of merit wherever exhibited, it was given an Award of Merit from the Royal Horticultural Society of England, and was awarded the First Prize of the Southport Show in England, for the best annual novelty introduced within the past ten years. It was also selected by the Seed Trade Associations among the All American Selections of Flower Varieties for 1932-33.

Award of Merit, Royal Horticultural Society, England, 1932.

First Prize, Southport, England, Fall Flower Show, for best annual novelty introduced during past ten years, 1932.

Gold Medal, All American Selections of Flower Seed Novelties for 1932-33, Seedsmen's Associations, U.S.A., 1932.

Gold Medal, Atlantic City Flower Show, 1931.

Gold Medal, Boston Flower Show, 1931.

Certificate of Merit, Royal Agricultural Society of South Australia for hardy outdoor plants, 1932.

The above are the principal honors won since first exhibited in May, 1931, and we have been informed that Golden Gleam has taken the honors in many other flower shows where it has been exhibited the past season.

The plant forms a vigorous, large bush which produces short runners, averaging 18 inches. The flowers commence as soon as the plant nears complete development and when well grown, produce a blaze of color, the long stemmed flowers standing well above and almost completely covering the foliage.

The plants may be forced in the greenhouse for early cut flower sales, the long stems lending themselves admirably to cut flower use, while the sweet scent given off is one of the most delightful characteristics of the flowers. For all around garden use Golden Gleam heads the list of annuals.

In quantities of 100 lbs. or more, \$.75 per lb.; per $\frac{1}{4}$ lb., \$.40; per lb., \$1.25

Aster New Super Giant Los Angeles
ELECTRO \$1.70

ASTER NEW SUPER GIANT LOS ANGELES

Through cooperation with Messrs. Howard & Smith, the originators, we now offer our customers the first of a new race of Asters, which promises to supersede all other strains for cut flower use. We have assumed the entire rights for distribution of this seed to the jobbing trade for the season 1934.

It is of the general habit of the Giants of California, but earlier and much larger than any of the Giants of California type yet introduced, hence the name, Super Giant Los Angeles. But, while the flowers are large, they are most artistic, due to the unusual curling and interlacing of the petals, giving a light feathery effect. The chief difference in flower form between this strain and the Giants of California is in a deeper, fuller centered flower in the new strain.

The color is a pure shell pink, one that has been entirely lacking in the Giants of California. We suggest that Los Angeles be used to round out the color range in the Giants until a full color range has been developed in this Super Giant race. The stems are stronger than in the Giants of California, and unusually long, while no disbudding is necessary due to the non-lateral habit.

Price.....per oz., \$2.50 per ¼ lb., \$7.50 per lb., \$25.00

ASTER GIANT MAMMOTH PAEONY FLOWERED SILVERY

ROSE (Bodger)

This is a fine long-stemmed variety, of true Paeony flowered type with immense flowers of deep lavender pink, which darken as they age, leaving the tips silvery white. A striking new variety and a good addition to this type.

Price.....per oz., \$1.50 per ¼ lb., \$4.50 per lb., \$15.00

ASTER GIANT MAMMOTH PAEONY FLOWERED ROSEBUD (Bodger)

A clear, deep rose, entirely new in this type. The flowers are large, well-formed, and fully double, borne on the long stout stems characteristic of the Paeony Flowered type. We recommend this very highly, especially for florists.

Price.....per oz., \$1.50 per ¼ lb., \$4.50 per lb., \$15.00

HUNNEMANNIA SEMI-DOUBLE SUNLITE (Bodger)

Unlike other double flowers this novelty develops a band of short petals on the outside, rather than the inside, of the cup. This adds to the size and attractiveness of the flower, giving the appearance of an open flower at all times. The color is the same as the single, a clear canary yellow.

Price.....per oz., \$1.00 per ¼ lb., \$3.00 per lb., \$10.00

Aster Giant Mammoth Paeony Flowered Silvery Rose

ELECTRO \$1.70

LARKSPUR GIANT IMPERIAL BLUE BELL (Bodger)

We offer Blue Bell, as supplying a color up to this time lacking in the Giant Imperial type, a clear light blue. The type is decidedly upright, with long basal branched flowering spikes.

Price.....per ¼ lb., \$2.40 per lb., \$8.00

LARKSPUR GIANT IMPERIAL LOS ANGELES IMPROVED (Bodger)

This is the popular variety, Los Angeles, in the improved Giant Imperial type. The color is the same as in the Stock Flowered type, a brilliant rose on salmon. It is very tall growing, truly upright, with immense basal branching flowering spikes.

Price.....per ¼ lb., \$2.40 per lb., \$8.00

LARKSPUR TALL DOUBLE STOCK FLOWERED ROSAMOND (Bodger)

This is a pure rose self, a new and distinct color in Larkspurs, which does not change with age. The height is 4 feet, and the strain is remarkably uniform, branched and heavily covered with the fully double flowers. This will supersede the old variety, Bright Rose, which fades badly.

Price.....per ¼ lb., \$1.50 per lb., \$5.00

PANSY ENGELMANN'S STRAINS

After an extensive tour of the Pansy growing centers of Europe and America, we selected for distribution Engelmann's Special and Engelmann's Giant Pansies, which we consider the outstanding strains now available. The Special strain is the old Scottish Show type, reselected to a strain of immense flowers. The colors are mostly bronze and reddish shades with some yellow edged ones. Engelmann's Giant is a very vigorous growing strain, producing flowers 3"-4" across. It contains a great variety of shades, both dark and light. Both strains are compact and early flowering. We are exclusive distributors of this seed in the United States.

Engelmann's Special....Price per oz., \$10.00, per ¼ lb., \$30.00, per lb., \$100.00

Engelmann's Giant.....Price per oz., \$10.00, per ¼ lb., \$30.00, per lb., \$100.00

SALPIGLOSSIS EMPEROR PURPLE, SELF (Bodger)

The color is a solid, deep purple, free from all veining, distinct from all other self colors in Salpiglossis. The flowers are large and well formed, and the color holds well.

Price.....per ¼ lb., \$1.50 per lb., \$5.00

Both professional and amateur gardeners are looking for something new. We highly recommend the foregoing novelties, and urge you to offer them in 1934. Write us for full particulars.

Marigold Guinea Gold
ELECTRO \$1.70

MARIGOLD GUINEA GOLD (Carnation Flowered California Gold)

Distinctly new in type, of graceful pyramidal habit, Guinea Gold produces a neat, compact plant, about 2½ ft. high, literally covered with blossoms. The flowers, about 2½ inches across, are semi-double in character, and loosely ruffled. The color is a brilliant golden orange or California gold, the color so much in demand by florists. When first introduced in England, it was offered as a bedding plant, but in the United States it quickly became known as a florists' cut flower, and its success has been phenomenal. The absence of the characteristic marigold odor has been in its favor, as well as its excellent keeping qualities when used as a cut flower.

Price.....per ¼ lb., \$1.80 per lb., \$6.00

ASTERS *a*

For years we have specialized in the growing of Asters. During this time we have been privileged to offer several distinct new strains and varieties, including the popular American Beauty type, Improved Giants of California, Improved Crego, and other famous American varieties.

This season we are offering what we consider one of the finest Asters of all time, New Super Giant Los Angeles, which is fully described on page 6.

BODGER'S WILT RESISTANT STRAINS

The most pretentious Aster improvement program we have undertaken is the development of wilt resistant strains.

When our fields became so badly wilt infested that it was no longer possible to harvest a crop of seed, it became apparent that we must take steps to remedy the condition. Upon investigation we discovered that there was no known method of control, once the plants have been attacked by the fungus. Then, through the cooperation of Dr. Jones of the Department of Plant Pathology of the University of Wisconsin, we began our program of developing strains which will withstand the attacks of the wilt.

The Aster wilt disease is caused by a parasitic fungus, *Fusarium congenitans* var. *callistephi* which is carried on the seed, on cultivating implements and in the soil. Once introduced into the soil, the fungus persists indefinitely, and attacks any Asters which may be planted there at any time thereafter.

Only through the use of resistant stocks is it possible successfully to grow Asters more than one year in the same soil.

Two years ago we offered our first six wilt resistant strains; this year we have wilt resistant strains of approximately one third the varieties we list. It is our hope and belief that in time we will be able to offer all varieties in resistant lines.

Although not novelties in the true sense of the word, we consider these Wilt Resistant Asters among the most noteworthy introductions of our long experience in the seed business, and were chosen among the All American Selections in 1932.

Wilt resistant asters, to justify the payment of a higher price for the seed, must be able to pass the acid test for resistance. Although wilt resistant strains will be rather generally offered this year, it is only through the use of the originator's stock that you can be sure of obtaining the benefits of the years of selection and work which we have devoted to this project.

In order to insure that our stocks maintain their resistance, it is essential that they be grown each year on highly wilt infested soil to eliminate any non-resistant lines which might recur. All our planting stock is developed from line-to-row selections in the Workshop, and undergoes a thorough check in the Experimental Grounds before being released to the Production Department. Although wilt resistant Asters can be grown in any soil, whether infected with the wilt fungus or free from all infection, this continuous rechecking is necessary for the maintenance of the high quality product which we offer our customers.

The varieties which we have to offer this year are listed concurrently with the ordinary or non-resistant strains, **under their respective type headings.**

We have grouped all Asters as to their respective flower types as nearly as it is possible to do so.

(See workshop views in rear of book.)

**IMPROVED GIANTS OF CALIFORNIA
CURLED AND INTERLACED f**

Characterized by the well-known Crego or Ostrich Feather type of flower, combined with the Beauty Aster's long, non-lateral branching stems and sturdy habit of growth, the Improved Giants of California type of Aster stands at the head of the list, not only for florists' use, but also for private gardens where quality is appreciated.

The large flowers are packed with broad, graceful petals, borne on stems 2-2½ feet long. The plants grow from 2½-3 feet, blooming from early July until frost.

EARLY BEAUTY *f* (Bodger)

We have noted with pleasure the steadily increasing popularity of the Beauty type Aster as a florists' flower. The colors are good, and their keeping qualities unsurpassed. They are excellent shippers and are rapidly superseding American Branching for general use.

Planted at the same time, the Early Beauties flower with the Crego and American Branching types, or, from early July until frost. The plants are from 2½-3 feet, with long, stout stems bearing large well formed flowers.

SUNSHINE TYPE FLOWERS
IMPROVED NEW GIANT CALIFORNIA SUNSHINE
FINEST MIXED, *f*

This lovely Aster has been rightly called the most beautiful Aster in the world. The flowers are large, 4-5 inches across, in shades of Enchantress Pink, Apple Blossom, Deep Rose, Blue and Lavender, contrasting with the light yellow or blue centers. The outer petals are somewhat loosely placed, giving an airy, lace-like effect which is altogether charming. The strain is not yet entirely fixed, producing a certain percentage of ordinary Sunshines, common singles, and doubles. This year's crop came about 50% true, and after the thorough rogueing given it, we expect next year's percentage will be raised to 60 or 65%. It should be borne in mind that the true type is the last to flower.

JOHN BODGER

Founder of our firm and originator of Dahlia Flowered Zinnias

ZINNIAS *a*

Ever since our founder began his historic work on Zinnias, the name Bodger has been closely associated with this popular flower. Our first major introduction was the Dahlia Flowered strain, an advancement which entirely changed the Zinnia trend. This, the first of the really large show type of flower, was followed in a few years by our later introduction the California Giants or Mammoth type.

Realizing the demand also for the smaller flowered, cutting type, we concentrated our efforts later to this end. Our introductions along this line have been numerous, including the popular Picotee Delight Salmon Rose and Pastel Mixed, the Early Wonder type, Crown O' Gold, new colors in the Pumila Dwarf Double and Lilliput types, and improvements in all other existing varieties.

CALIFORNIA'S CHOICEST FLOWER SEEDS — SINCE 1890

--	---------	--------------	---------

DAHLIA FLOWERED (Bodger)

The Dahlia Flowered strain was introduced by us in 1919, and all the colors have been of our introduction at various times since then. We are justly proud of the many medals and awards of merit which have been awarded our Dahlia Flowered Zinnias.

The plants are of medium height, 2-3 feet, very robust bearing many long stems of the fully double, huge flowers, which resemble the show type of Dahlia.

We have marked the most popular varieties with an asterisk (*).

*Canary Bird, rich canary yellow.....	1.50	5.00
*Crimson Monarch, deep crimson, flowers very large.....	1.50	5.00

Separate Colors.....	.80	2.40	8.00
Special Gold Medal Mixture, containing all the varieties, grown as separate colors.....	.70	2.10	7.00

These are extra select strains especially suited for florists' use. The seed is hand picked from the earliest and best flowers of the season.

CROWN O' GOLD MIXTURE f (Bodger)

This aristocrat among Zinnias retains its place as an outstanding novelty. Each petal of the flower is overlaid with a deep golden yellow at the base, while carrying out the individual flower color at the tip. The color range includes the popular florist shades: Old rose, cream, yellow, carmine red, pink, etc.....

.80	2.40	8.00
-----	------	------

CALIFORNIA GIANT OR MAMMOTH (Bodger)

Introduced by us in 1926, this type has rapidly gained in popularity. The plants are taller than the Dahlia Flowered type, 3-4 ft., with long stems which adapt it particularly for use as a cut flower. The flowers are very large and flat, giving a graceful effect.

GIANT IMPERIAL *f*

Tall, upright, compact, basal branching in habit, the Giant Imperials have superseded all other types of Larkspurs for florists' and general garden use. The delphinium like spikes of double flowers, carried on stems 4-5 feet long, are compactly placed on the upright growing plants, requiring only about one-half the space needed for the old stock flowered type of Larkspur.

HOLLYHOCK *p*

Triumph Mixed, a remarkable new early flowering Hollyhock, growing 4-5 feet high. Hollyhock Triumph is of branching habit, all the stems being studded with prettily waved and fringed flowers, which appear in a kaleidoscopic variety of colorings hitherto unknown in the genus, including all the basic colors and many charming bicolor combinations.....	3.00	10.00
Imperator, large fringed rosette flowers, colors ranging from delicate pink through cerise salmon.....	2.70	9.00
Double Orange Prince (new). We take great pleasure in introducing this robust growing, double flowered innovation in Hollyhocks. The color brings a distinct new shade to the genus, and may be described as a rich apricot orange.....	3.00	10.00
Exquisite, claret red.....	2.10	7.00
Semi-double, Alleghany, finest Mixed.....	.45	1.50
“ “ Annual Finest Mixed.....	.45	1.50
Single Annual, Finest Mixed.....	.30	1.00

Early flowering Spencers—once used exclusively by Florists and Growers for culture in green houses, are now being planted outside, especially in the Southern States and countries of mild climates. If planted after danger of heavy frost is past, they grow rapidly, come into flower two weeks earlier and continue blooming throughout the season. Flowers equal to the Late Spencers.

CUCUMBER ROLLINSON'S TELEGRAPH..... 3.60 12.00

(1)—Geo. J. Ball and J. C. Bodger discussing the Aster wilt problem with Miss Elizabeth Bodger, who has charge of the development of wilt-resistant strains. This snap was taken in our Aster workshop during the summer of 1932. The blank space in the foreground is caused by a non-resistant strain, planted beside the resistant selections, as a check plot. (2) and (3)—General views of the wilt resistant line-to-row Aster Workshop.

NEW SEMI-DOUBLE NASTURTIIUM GOLDEN GLEAM

The story about this plant is as follows: My friend, Mr. J. C. Bodger of El Monte, Los Angeles, California, found it growing in a small garden in California. He secured the stock from the owner of the garden, and all the information he could obtain about it was that it came from Mexico. Mr. Bodger spent some weeks in Mexico on the hunt for it, but without success. He began developing the stock on one of his company's ranches. Two years ago my son David visited California and saw the Nasturtium in bloom, and wrote home to me that I should get in touch with Mr. Bodger about it. The following spring Mr. Bodger sent to a number of leading seedsmen in America and Europe small trial packets. I was fortunate to get a large trial packet, some 200 seeds. Doubtless the reason for getting such a generous packet was that in Mr. Bodger's father's time I had grown and my company exhibited a grand lot of their Giant Dahlia Flowered Zinnias, which secured the Gold Medal of the Royal Horticultural Society, and also its Award of Merit. We grew the Nasturtium at Marks Tey and exhibited it for the first time in Europe at Chelsea Show in May, 1931. In the autumn of 1931 it was offered by Bodger's and was immediately taken up by the seed trade all over the world. Mr. J. C. Bodger resolved to release one ton of it and that was not quite equal to the demand. This last summer he planted thirty-five acres and hoped to harvest ten tons of seed. This has not been quite accomplished, but in the spring of 1933 it will be very widely offered. It secured the Award of Merit of the R.H.S. after trial at Wisley in the summer of 1932, and also won the valuable prize at Southport Show, 1932, as the most worthy new plant of recent introduction.

WM. CUTHBERTSON

The above is Mr. William Cuthbertson's story of Nasturtium Golden Gleam, as published in this year's January issue of *New Flora and Silva*, a high-class magazine published in England, which deals in a scientific manner with all new, worth-while discoveries in the field of horticulture.

—IN APPRECIATION—

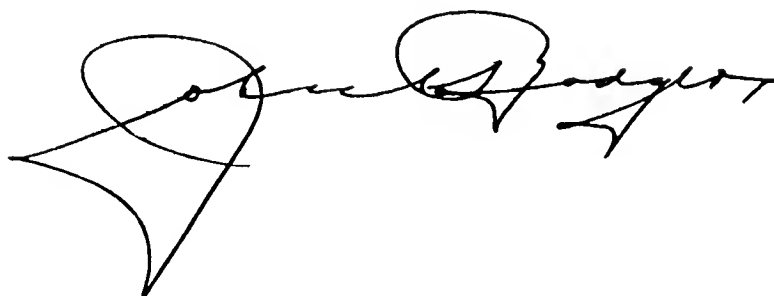

My friend Mr. Cuthbertson is Director of Messrs. Dobbie & Co., Edinburgh, Scotland. His establishment, a strictly retail, mail-order house, catering exclusively to home gardeners throughout the world, expects to distribute nearly a half ton of *Golden Gleam* this spring. This volume of business is a substantial tribute to its popularity.

To be given the credit of introducing to the world a novelty like this engenders a considerable amount of pleasure to one who has devoted some twenty-five years in the field of horticulture, and I sincerely appreciate the distinction bestowed upon my firm for this as well as for the other introductions which have been accepted in the past, but I fully realize we as hybridizers and growers cannot reap the full benefits of our arduous years of work and close attention to our business without the assistance of our customers, who present these novelties to the buying public. I, therefore, take this opportunity of again expressing my appreciation of their liberal co-operation, as shown by the fact that *Golden Gleam* has been illustrated and given space in more catalogues than any other novelty in recent years.

Visualizing the possibilities of developing a new race of Nasturtiums when we first discovered Golden Gleam, we set to work immediately crossing it with various colors found in the ordinary single varieties. Many interesting F1 and F2 hybrids have resulted from these crosses, giving us the assurance that within the next few years we will be able to offer to the trade a large color group of this extraordinary break in Nasturtiums of which Golden Gleam is the progenitor.

We are pleased to announce that to date we have been especially successful in the development of a beautiful counterpart to Golden Gleam, in a brilliant shade of orange scarlet. We hope to have this novelty ready for introduction sometime within the near future.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "George W. Rogers". The signature is fluid and cursive, with a large, stylized initial "G" and "R".

The above picture shows a view of the Nasturtium workshop, demonstrating the extent of individual selection and segregation necessary for the development of a new strain.

Here are a few compliments taken from our correspondence during the past season:

Melbourne, Australia: "California Asters best in world, also Dahlia Flowered Zinnias."

England: "Sunshine Asters fine display at Southport Show. Predict big demand."

Indiana: "Quality Bodger seeds unquestioned."

Queensland, Australia: "Zinnias splendid success. Advertising over wireless. Receiving letters praising wonderful blooms. Larkspurs wonderful colorings."

Alabama: "Could not satisfy critical trade if unable to secure Bodger seeds."

Los Angeles: "Larkspurs splendid quality, true to type and color."

Rochester, N. Y.: "Zinnias showing up remarkably well. Stocks improving in quality and trueness."

Paris, France: "Having had entire satisfaction with your novelty Nasturtium Golden Gleam, I intend to follow your novelties every year. Please send me trials of your new Aster Los Angeles."

Experimental Station, Bonn, Germany: "In 1927 we obtained some seed of the California Giant Asters which were introduced by Bodger Seeds, Ltd. of Los Angeles. We experimented with same in conjunction with our German Ostrich Plume and Hohenzollern Asters. The California Giant proved superior in growth and size of flower and we are convinced that the California Giant is the most wonderful acquisition and of the greatest value for the cut flower market."

South Africa: "Find your seed easy to sell because it is good."

New Zealand: "Vitality very satisfactory."

Australia: "Seed highly satisfactory."
